# we can help there, too.

**Are you  
tasked to  
do more  
with less?**

**Is staffing  
under  
pressure?**

**Are you  
looking for  
a technical  
partner?**

Now with Swagelok Custom Solutions, we have a solution for you. Swagelok Custom Solutions allows you to tap into the full capabilities that Swagelok has to offer: 60 years experience in fluid systems solutions, deep industry expertise, and the ability to deliver consistent high-quality assemblies globally to meet the needs of your business – no matter where your business is located. Your authorized Swagelok representative can work with you to create anything from simple to very complex custom assemblies. As a result you get:

**More efficiency**

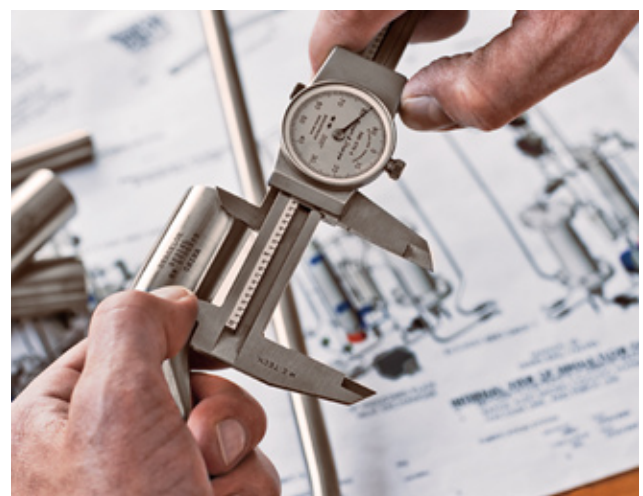

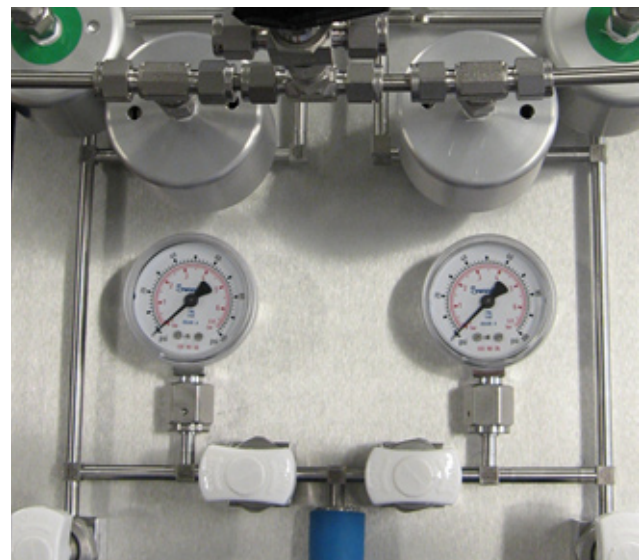

**Greater flexibility**

**Technical expertise**

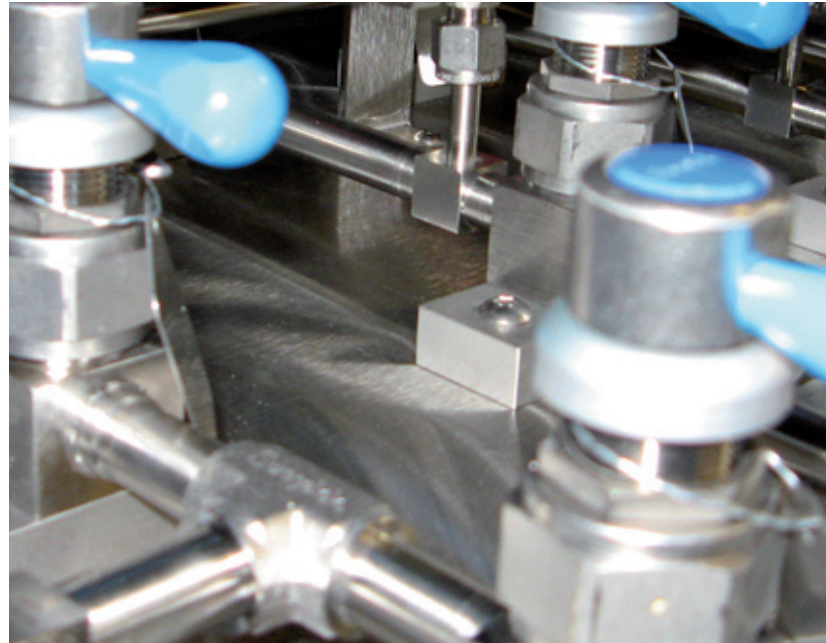

**Faster response**

**Global capabilities delivered locally**

**Work taken off your desk**

# Swagelok technology: expertise close at hand

Swagelok Custom Solutions delivers so much more than custom assemblies. Our authorized sales and service representatives, regional technology centers, and highly trained field engineers are at your service to create assemblies to meet the unique needs of your application – from idea through to finished product. Whether simple and small, or large and complex, our Swagelok team will work with you to solve your assembly needs.

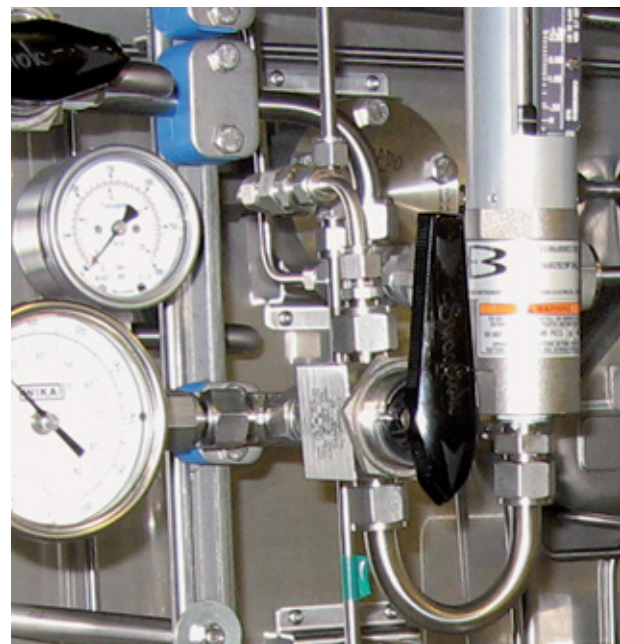

And Swagelok offers flexibility to work with you however you choose. We can:

Build from scratch (create the P&ID)

Convert from an existing P&ID

Build from your drawing

Since it comes from Swagelok, you can count on consistent high quality. Plus all assemblies are tested and delivered with supporting documentation.

Standard services such as bending, welding and electrical are available. We will also source and integrate third-party products into your assembly, as required.

Swagelok Custom Solutions can deliver a real competitive edge but we can do even more. When you need custom components, we offer custom product development to alter or expand the functionality of existing Swagelok products to meet the specific needs of your application.

In today's fast moving global market every business needs to be able to do more with less. We have deep industry expertise across a wide range of industries with special focus on:

Alternative fuels

Instrumentation

Oil & gas

Chemical / Petrochemical

Biopharmaceutical

Power

Research

Semiconductor

the CAD ...

build it...

and warranty it.

# Better for you and better for your business

When you work with Swagelok, you get:

Consistent product quality and reliability

Fast, effective & efficient service

Technical capability & applications expertise

Added value in each assembly

Qualified process and procedures

Warranty on all products and services

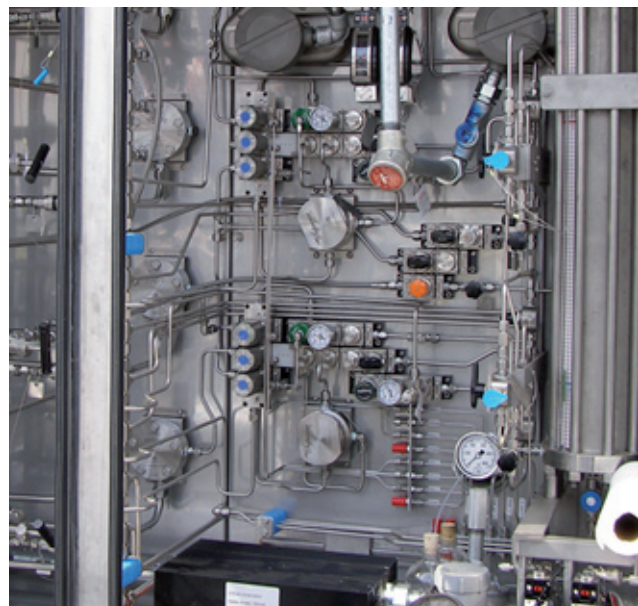

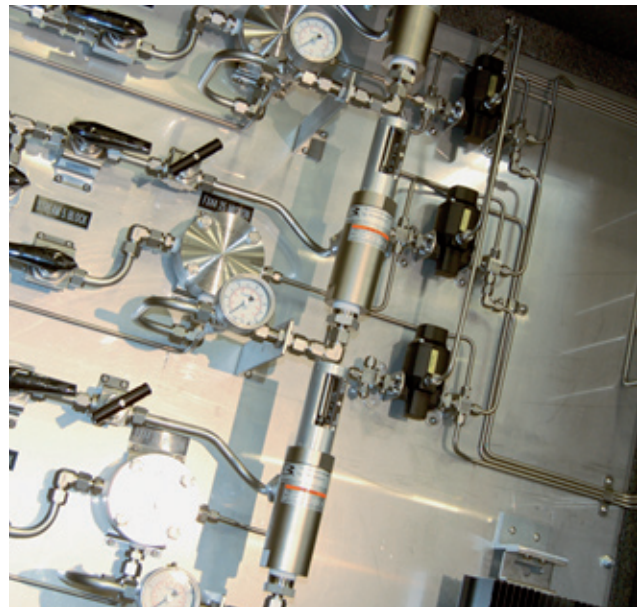

As always, Swagelok products and services, including assemblies, are backed by our limited lifetime warranty. (For full warranty information, visit [swagelok.com/warranty](http://swagelok.com/warranty)).

All of this makes Swagelok Custom Solutions assemblies a real business tool.

All Swagelok associates across the globe are certified to ensure that they consistently meet the same high Swagelok standards our customers expect, which is validated via an independent, third-party registrar.

So whether it's simple or complex, your authorized Swagelok representative will work with you to bring the right level of Swagelok resources to resolve your unique assembly needs.

Put us to the test today or visit [swagelok.com/customsolutions](http://swagelok.com/customsolutions) to find out more.
